An article in The Economist states...

*“An Index of tangible alternative assets classes, compiled by Knight Frank, a consultancy, shows that returns on rare coins over ten years to the end of 2016 were **195%**, easily beating art (139%), stamps (133%), furniture (-31%), and the S&P 500 index (58%)...Coins are more portable than paintings or furniture, and boast a higher value-to-volume ratio. Stamps maybe lighter, but, come doomsday, cannot be melted down.”*
